

Country Dairy

is

West Michigan's
on-Farm Dairy that:

PROCESSES ITS OWN MILK

We only bottle milk from our own cows so we can control the quality by setting very high standards of herd health and cleanliness of facilities. Since every bottle of milk traces to us we intend to be very particular about the raw milk supply.

DELIVERS ITS OWN MILK

Milk is processed the same day that it comes from the cow. It is done with the most up to date equipment in the dairy industry. We take a great deal of pride in the cleanliness of the plant.

PRODUCES ITS OWN MILK

Service to you is provided in country Dairy's refrigerated trucks. Milk that comes from the cow can come to you the same day.
